

Geberit AquaClean
The WC that cleans you with water.

 GEBERIT

The modern well- being.

I  Water®

Experience the Geberit AquaClean feeling.

Water is an integral part of daily personal hygiene. It cleans, refreshes and brings a new feeling of well-being. In Far Eastern culture, it has long been natural to clean yourself with water after using the toilet. And over here, too, more and more people are being won over by gentle, natural toilet hygiene that uses water instead of paper. Geberit AquaClean offers you this well-being experience at the touch of a button. Discover the WC that cleans you with water. And enjoy the feeling of absolute freshness and cleanliness all day long.

Refreshing variety.

Geberit AquaClean at a glance.

Shower principle 7

Pure cleanliness: the clever Geberit AquaClean shower function brings a new feeling of well-being at the touch of a button.

Innovation 8

Clear shapes: the latest model, the Geberit AquaClean Sela, has a winning streamlined design and fits discreetly into any bathroom environment.

WC enhancement solutions 12

Simple and flexible: the practical enhancement solution models turn a standard toilet into a WC with shower function with little outlay required.

Design solutions 14

Installation made easy: in combination with Geberit Monolith or the Geberit AquaClean Design Panel, all WCs with integrated shower function can also be installed with no conversion required.

Complete solutions 10

Elegance and comfort: the shapely WCs provide gentle hygiene and personalised comfort that meet the highest requirements.

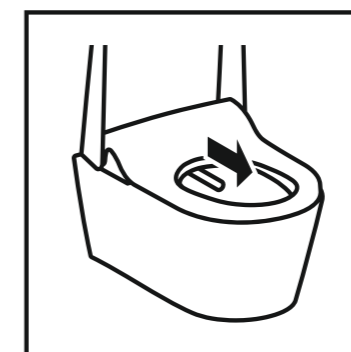

Pure cleanliness and freshness at the touch of a button.

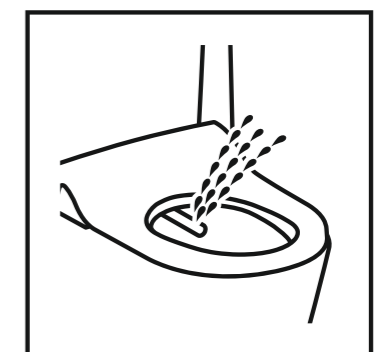

The shower principle is simple: at the touch of a button, the concealed spray arm extends and cleans you with a jet of warm water: comfortable and very hygienic. You decide the strength of the water spray. Depending on the model, you can also enjoy additional comfort and pampering: the oscillating spray arm cleans you especially thoroughly with its even forward and backward motion, the pulsating massage invigorates, and the soft lady wash provides gentle and natural personal hygiene for ladies. Odour extraction and a beneficial warm-air dryer round off the Geberit AquaClean well-being experience.

Pure hygiene.
The shower nozzle is rinsed with clean water before and after use.

Start the spray.
The integrated spray arm extends at the touch of a button and the cleaning process begins.

Adjust the spray.
Too strong or too weak? You can adjust the intensity of the water spray individually.

Geberit AquaClean Sela

A new dimension in cleanliness.

Geberit AquaClean Sela cleans you with a gentle, airy water spray at body temperature. The intensity can be adjusted to one of five levels, while the oscillation ensures a pleasant cleaning experience. Thanks to the integrated user identification function, the water starts heating automatically as soon as you approach the WC. The ceramic unit delivers an above-average flushing performance and comes with a dirt-repellent surface. The ergonomically shaped seat is simple and quick to remove together with the lid, making cleaning easier. Just like all Geberit AquaClean models, this product also complies with European Ecodesign requirements and, thanks to its energy-saving function, consumes a minimal amount of energy even in standby mode.

1 A gentle, airy water spray washes you clean with an intensity that is comfortable for you – choose from five different spray pressure levels.

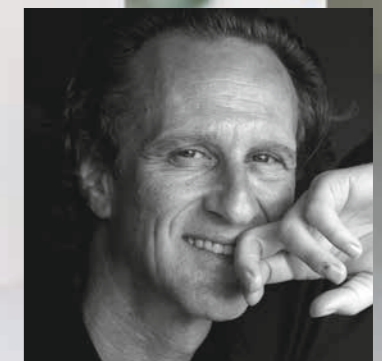

2 As with all models, the shower nozzle is rinsed with clean water before and after you use the toilet.

3 The intuitive remote control makes the shower function really easy to switch on and adjust.

4 Alternatively, use the clearly laid-out control panel, concealed elegantly beneath the lid.

Geberit AquaClean Sela: a WC with shower function that looks just like a normal WC.

Created by architect and designer Matteo Thun, Geberit AquaClean Sela fits virtually any bathroom environment thanks to its simple contours. The intelligent shower function technology, the power supply lines and the water pipes are integrated into the ceramic unit, making them invisible. The water spray feels gentle and airy and ensures maximum cleanliness and minimum water consumption. Geberit AquaClean Sela brings together modern standards of hygiene, design and sustainability.

DESIGN PLUS
powered by: ISH

**Elegant and comfortable.
The Geberit AquaClean
complete solutions.**

Geberit AquaClean 8000 and 8000plus combine the function of a toilet with the cleaning capabilities of a bidet. With their elegant design, the WC complete solutions cut a fine figure in any environment. However, the two models also set the highest standards in terms of cleanliness and comfort. The pleasant water spray and the additional pampering functions of the Geberit AquaClean 8000plus provide a unique feeling of freshness and give a noticeable boost to your daily well-being.

Geberit AquaClean 8000

The standard for modern well-being.

Geberit AquaClean 8000 washes you clean with a full yet smooth water spray at body temperature. Its intensity can be individually adjusted. An oscillating spray ensures a particularly thorough clean, and the nozzle cleans itself automatically after each use. The high-quality dirt-repellent ceramic surface allows for quick and easy cleaning.

Geberit AquaClean 8000plus

The deluxe pampering programme.

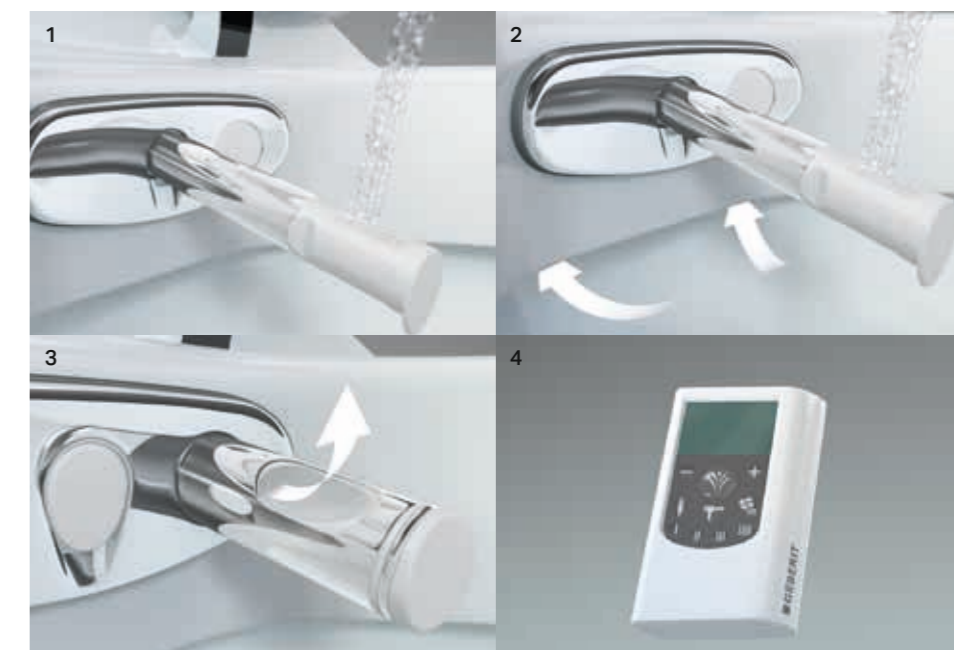

Geberit AquaClean 8000plus leaves nothing to be desired and offers many extra pampering functions in addition to the water spray: the spray temperature and intensity can be adjusted to suit your personal preferences. The pulsating massage function has an invigorating effect, while the soft lady wash guarantees gentle personal hygiene for ladies. As soon as you sit down on the toilet, the automatic odour extraction function switches on, creating a pleasant ambiance of freshness in the room. After the spray has finished, the integrated warm-air dryer dries you off in comfort. The final practical touch: all functions can be individually adjusted and your preferences saved via remote control. Geberit AquaClean 8000plus is also available with a cistern in front of the wall. Two versions of the model are available: wall-hung or floor-standing.

1 The full yet smooth water spray can be individually adjusted. The oscillating spray setting, massage function and lady wash provide extra comfort.

2 The automatic odour extraction function rounds off the well-being experience.

3 Comfortable and practical: after the spray has finished, the warm air dries you off gently.

4 Using the remote control, you can create your own personal pampering programme, store it and retrieve it time and again.

**Ideal for modernising.
The Geberit AquaClean WC
enhancement solutions.**

The simplest way to a new feeling of freshness: even if you're not currently looking to replace your entire toilet, you don't have to go without the comfort of a WC with shower function. Geberit offers the ideal solution for transforming your existing toilet into a modern WC with integrated shower function in just a few steps: the practical Geberit AquaClean WC enhancement solutions can be fitted quickly and easily onto virtually all standard WC ceramic units. Only the seat is replaced; the ceramic unit is retained. And, as with all Geberit AquaClean models, when it comes to kitting out your WC enhancement solution, you can choose from simple right through to multifunctional.

Geberit AquaClean 4000

Hygiene for every home.

Geberit AquaClean 4000 offers all the basic functions you need from a WC with integrated shower function. The practical enhancement solution washes you clean with a gentle and airy water spray at body temperature and at the intensity you choose. The control panel is easily accessible and self-explanatory. And, as with all Geberit AquaClean models, this one comes with a soft-closing lid: simply tap it gently and the seat and lid lower automatically and close without a sound.

Geberit AquaClean 5000

Refreshing extras
in a compact design.

Geberit AquaClean 5000 combines the shower function with a few additional extras in a compact enhancement solution. The intensity of the powerful, effervescent water spray at body temperature can be adjusted, while the oscillating spray ensures an especially thorough clean with its even forward and backward motion. The automatic odour extraction function starts up after you sit down, ensuring the air in the room is pleasantly fresh.

Geberit AquaClean 5000plus

The multi-talent for personalised
comfort.

Geberit AquaClean 5000plus combines the shower function and all additional pampering functions in a single WC enhancement solution. The temperature and intensity of the powerful, effervescent water spray can be adjusted to suit your preferences. The oscillating spray ensures an especially thorough clean, the pulsating massage spray has an invigorating effect and the lady wash guarantees gentle personal hygiene for ladies. Odour extraction, a warm-air dryer and an individually adjustable remote control round off this multi-talented product.

1 The practical WC enhancement solutions are easy to fit onto your existing toilet and connect to the water and power supply.

2 The water spray strength can be individually adjusted. The spray nozzle is cleaned automatically before and after every use.

3 On the Geberit AquaClean 5000 and 5000plus, an automatic odour extraction function rounds off this unique comfort experience.

Geberit Monolith

The stylish alternative.

Sometimes, it is just not possible to conceal the cistern behind the wall – either due to time or budgetary constraints or the basic structure of your home. The Geberit Monolith sanitary module replaces conventional visible cisterns in an intelligent and aesthetically pleasing way. All the sanitary technology is cleverly hidden behind a high-quality glass panel. The Monolith can be connected quickly and easily to existing water and wastewater pipes and makes an ideal combination with Geberit AquaClean products, meaning your WC with shower function can be up and running in no time.

Geberit AquaClean Design Panel

Renders connecting pipes invisible.

For everyone who wants to enjoy the benefits of a WC with shower function quickly and flexibly: the Geberit AquaClean Design Panel is the ideal solution for retrofitting the Geberit AquaClean models. It conceals all the necessary connecting pipes in an elegant way and guarantees an impeccable overall impression in your bathroom in no time – without the need to drill into any tiles or the wall. The flush plate comes pre-integrated. In line with the latest interior design trends, the Design Panel is available in either waterproof, Alpine white laminated plastic or black and white glass.

Your quick, flexible and aesthetically pleasing way to a new feeling of freshness.

In combination with a WC enhancement solution, the Design Panel is also the perfect flexible solution for rented properties: when you move out, it can be removed without leaving any traces and reinstalled in your new home.

Smart design solutions. Comfort starts with the installation.

For everyone who wants to transform their bathroom into an oasis of well-being in just a few steps: as well as its comfortable WCs with integrated shower function, Geberit also offers smart solutions for simple, aesthetically pleasing installation. For instance, there is the innovative Geberit Monolith sanitary module, which, in combination with a Geberit AquaClean, makes for a stylish alternative to a conventional WC with visible cistern. The Monolith captivates with its sophisticated look and integrates harmoniously into existing and new room designs. Not for nothing did it claim the "iF product design award 2010".

2010

Winner

Good reasons to choose Geberit AquaClean. Quality products for life.

About Geberit.

For almost 140 years, the Geberit Group has been delivering innovative products and setting trends in sanitary technology. Since the late 1970s, Geberit has been actively involved in developing WCs with an integrated shower function and, with over 30 years' experience, has built up considerable expertise with these products. The Swiss company is the leader on the European market and renowned throughout the world for excellent design, longevity and environmental efficiency. Sustainability is very important to Geberit, which is why products are optimised with regard to their eco-friendliness and durability while they are still in the development stage. Thanks to Geberit's high-end solutions, sanitary installers can meet virtually all requirements and make the dream of a truly unique bathroom come true.

Customer service and EU standard.

Guaranteeing the quality and safety of its AquaClean models is Geberit's top priority. For this reason, all products of the Geberit brand are CE-compliant and fulfil all the relevant European requirements including the drinking water standard EN 1717. Geberit ensures compliance with this standard with an integrated water connection that is protected against backflow, guaranteeing that Geberit's high-quality WCs with integrated shower function can never contaminate the drinking water grid. All Geberit AquaClean models come with an energy-saving mode and comply with the European Ecodesign Directive. Should a fault nevertheless occur, the reliable Geberit service technicians will be on hand quickly wherever the problem arises.

Materials and three-year warranty.

In its WCs with integrated shower function, Geberit uses only high-quality materials such as Duroplast and ASA for its visible parts, which do not yellow. Geberit also offers its end customers a three-year warranty. In the first two years, Geberit will repair or replace faulty parts free of charge. In the extra third year, Geberit will cover the cost of replacement parts in the event of material or production faults affecting an AquaClean model.
